Premium (Discount)	(5.7%)

INVESTMENT STRATEGY

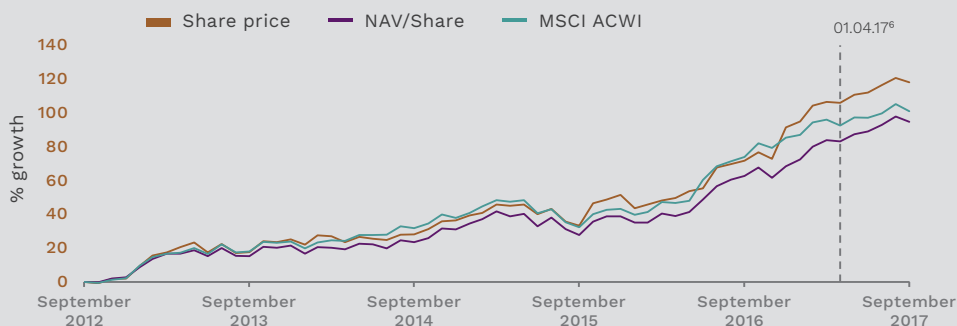

The equity portfolio brings together an alliance of best-in-class² equity managers and their best ideas – all at a competitive cost. It provides access to eight managers from around the world each investing only in their top stock selections. Most of these managers are not otherwise available to individual UK investors. The equity portfolio target is to outperform the MSCI All Country World Index by 2% per year after costs over rolling three year periods. Alliance Trust has a progressive dividend policy and has increased its dividend every year for 50 years.

INVESTMENT OBJECTIVE

Alliance Trust is an investment company with investment trust status. The Trust's objective is to generate a real return for our shareholders over the medium to long term by a combination of capital growth and a rising dividend. The Trust has no fixed asset allocation benchmark, although it mainly invests in global equities, but can use a range of asset classes throughout the world to achieve its objective. The Trust aims to be a core holding for investors seeking to increase the value of their investments over the long term.

OCR Year to 31 Dec 2016	0.43%

Please remember, past performance is not a guide to future performance, and the value of shares and the income from them can rise and fall, so investors may not get back the amount originally invested. Net Asset Value ("NAV") performance is not the same as share price performance and investors may not realise returns the same as NAV performance.

Notes: All data is provided as at 30 September 2017 unless otherwise stated. All figures may be subject to rounding errors. Sources: Investment Performance data is provided by BNY Mellon Performance & Risk Analytics Europe Limited, Morningstar and MSCI Inc; Key Statistics, Key Facts and Charges data is provided by BNYM Fund Services (Ireland) Limited. NAV Total Return is net of management fees. In order to report the long-term record of the equity portfolio, the returns of the portfolio prior to its restructure early in April 2017 have been combined with the returns to date of the current portfolio. Equity portfolio returns prior to December 2012 are not comparable and have been excluded from the long-term record. Equity portfolio return is the return achieved by the eight equity managers and so includes the effect of any of their cash holdings (gross of their fees). Returns are quoted net of withholding taxes (some of which are potentially recovered at a later date) and therefore potentially underestimate the managers' relative performance. Total NAV returns are after all manager fees (including WTW's fees) and allow for any tax reclaims when they are achieved.

- NAV includes income with debt at fair value.
- As rated by Willis Towers Watson.
- Assets valued with debt at par.
- Total borrowings at par divided by net assets.
- Annual dividend per share divided by share price.
- Performance since Willis Towers Watson assumed responsibility for management of the portfolio.

INVESTMENT COMMENTARY

Over September, the Trust's total shareholder return, NAV total return and equity portfolio return were -1.2%, -1.6% and -1.4% respectively, outperforming the MSCI All Country World Index (ACWI) which returned -2.1% over the same period.

During the month, geopolitical events around the world continued to develop. There were increased tensions between the US and North Korea, and continuing tensions and uncertainty emerging from Brexit negotiations. A likely consequence of Brexit that the Bank of England has signalled is an increased difficulty in recruiting staff which was likely to have an inflationary impact. This was a key factor in the Bank of England suggesting that an increase in base interest rates this year was very likely and with more possibly to come next year. As a result, Sterling appreciated versus most major currencies, which acted as a drag on overall returns from the Trust's foreign investments.

We continue to expect increased volatility from the current low levels and believe that this increased volatility will create dispersion within markets and sectors. We believe that this environment will be ideal for talented stock pickers like those managing the Trust's underlying portfolios.

ACTIVE SHARE | 80%

Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index.

Important information

Alliance Trust is an investment company with investment trust status. The views, information and data in this publication should not be deemed as a financial promotion or recommendation. Alliance Trust is not authorised to give financial advice. Please remember past performance is not a reliable indicator of future performance. The value of your investment, and any income from it, may decrease as well as increase and you may not get back the amount you invest. For security and compliance monitoring purposes, telephone calls may be recorded. Exchange rate changes may cause the value of overseas investments to go down as well as up. Investment trusts may borrow to finance further investment (gearing). The use of gearing is likely to lead to volatility in the NAV, meaning that a relatively small movement, down or up, in the value of a trust's assets will result in a magnified movement, in the same direction, of that NAV. This may mean that you could get back nothing at all. All data in this document is as at 30 September 2017 unless otherwise stated.

Share investment

Alliance Trust invests primarily in equities and aims to generate capital growth and a progressively rising dividend from its portfolio of investments. Alliance Trust currently conducts its affairs so that its shares can be recommended by Independent Financial Advisers (IFAs) to ordinary retail investors in accordance with the Financial Conduct Authority (FCA) rules in relation to non-mainstream investment products and intends to continue to do so for the foreseeable future. The shares are excluded from the FCA's restrictions which apply to non-mainstream investment products because they are shares in an investment trust. The shares in the Trust may also be suitable for institutional investors who seek a combination of capital and income return. Private investors should consider consulting an Independent Financial Adviser who specialises in advising on the acquisition of shares and other securities before acquiring shares. Investors should be capable of evaluating the risks and merits of such an investment and should have sufficient resources to bear any loss that may result.

Issued by Towers Watson Investment Management Limited. Towers Watson Investment Management Limited, registered office Watson House, London Road, Reigate, Surrey RH2 9PQ is authorised and regulated by the Financial Conduct Authority, firm reference number 446740.
