

# MONTHLY FACTSHEET

31 MAY 2019

## KEY STATISTICS

Share Price	754.0p
Net Asset Value <sup>1</sup> (NAV) per Share	790.5p
Premium (Discount)	(4.6%)

## INVESTMENT STRATEGY

The equity portfolio brings together an alliance of best-in-class<sup>2</sup> equity managers and their best ideas – all at a competitive cost. It provides access to eight managers from around the world each investing only in their top stock selections. Most of these managers are not otherwise available to individual UK investors. The equity portfolio target is to outperform the MSCI All Country World Index by 2% per year after costs over rolling three year periods. Alliance Trust has a progressive dividend policy and has increased its dividend every year for over 50 years.

## INVESTMENT OBJECTIVE

The Trust's objective is to be a core investment for investors that delivers a real return over the long term through a combination of capital growth and a rising dividend. The Trust invests primarily in global equities across a wide range of different sectors and industries to achieve its objective.

Alliance Trust has been awarded the AIC's Dividend Hero award and is proud to have over 50 years of consecutive dividend growth.

## CHARGES

Targeted Ongoing Charges Ratio (OCR)	Less than 0.65%
OCR Year to 31 Dec 2018	0.65%

**Please remember, past performance is not a guide to future performance, and the value of shares and the income from them can rise and fall, so investors may not get back the amount originally invested. Net Asset Value ("NAV") performance is not the same as share price performance and investors may not realise returns the same as NAV performance.**

Notes: All data is provided as at 31 May 2019 unless otherwise stated. All figures may be subject to rounding errors. Sources: Investment Performance data is provided by The Bank of New York Mellon Performance & Risk Analytics Europe Limited, Morningstar and MSCI Inc; Key Statistics, Key Facts and Charges data is provided by The Bank of New York Mellon (International) Ltd. In order to report the long-term record of the equity portfolio, the returns of the portfolio prior to its restructure early in April 2017 have been combined with the returns to date of the current portfolio. NAV total return is based on NAV including income with debt at fair value, after all manager fees (including Willis Towers Watson's fees) and allow for any tax reclaims when they are achieved. The NAV total return shown in the factsheets up to May 2018 was based on NAV excluding income with debt valued at par. The OCR target of 0.65% is based on NAV reported as at 31 December 2017. **Movements in exchange rates can impact on both the level of income received and capital value of your investment.**

- NAV includes income with debt at fair value.
- As rated by Willis Towers Watson
- Assets valued with debt at par.
- Total borrowings at par divided by net assets.
- Total borrowings at par minus total cash and equivalents, divided by net assets.
- Annual dividend per share divided by share price.
- All Country World Index
- Since Willis Towers Watson assumed responsibility for management of the portfolio.
- Equity portfolio return is the return achieved by the eight equity managers and so includes the effect of any of their cash holdings. This return is shown gross of fees and does not include the positive impact of share buybacks or leverage. Returns are quoted net of withholding taxes (some of which are potentially recovered at a later date) and therefore potentially underestimate the managers' relative performance.

## TOP 20 HOLDINGS

Name	£m	%
Alphabet	86.8	3.1

## INVESTMENT COMMENTARY

For the month of May, the Trust's total shareholder return, NAV total return and equity portfolio returned -3.5%, -4.5% and -4.1% respectively. The benchmark MSCI All Country World Index (ACWI) returned -2.6% over the same period.

The first four months of 2019 was an exceptionally profitable period for equity investors. The MSCI ACWI returned 16.6%, in local currency terms, during that period. To put this into context, since records of the MSCI ACWI index began in 1987, there have only been 10 other instances where the performance over any given consecutive 4 month period has exceeded 16% (out of a possible 374 observations). The likelihood of observing such a level of return is less than 3%, or roughly, once in eleven years.

However, fortunes turned rather quickly in May as geopolitical risks returned to centre stage. The prospect of a global trade dispute was raised with the announcement of tariff increases on \$200 billion of US imports from China, with retaliatory measures from China impacting \$60bn in imports from the US. The impact of the trade dispute is already being felt with the US Manufacturing Purchasing Managers Index, falling for the first time since 2009. US-China and US-Mexico trade issues are having a particular impact across emerging markets, with Chinese and Mexican equities leading the sell-off that saw emerging market equities underperform developed markets for the month. In an uncertain economic market such as this, defensive stocks in sectors such as consumer staples and utilities have performed better across the Trust's equity portfolio, falling less than other securities. The stock pickers continue to focus on maximising long-term returns and the Trust underperformed in the month of May as the market favoured more defensive positions in the near term.

The Trust's stock pickers continued to find new opportunities to add to the Trust's equity portfolio throughout May. A new position was established in DS Smith, a leading provider of recycled corrugated packaging in Europe. The stock picker was impressed with its strong track record of acquiring competitors and creating value in a fragmented market. Other new names added to the portfolio in May included UK power tool manufacturer Makita and Swiss pharmaceuticals company Novartis.

ACTIVE SHARE | 81%

Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index.

**Please remember past performance is not a reliable indicator of future performance. The value of your investment, and any income from it, may decrease as well as increase and you may not get back the amount you invest. Exchange rate changes may cause the value of overseas investments to go down as well as up. Investment trusts may borrow to finance further investment (gearing). The use of gearing is likely to lead to volatility in the NAV, meaning that a relatively small movement, down or up, in the value of a trust's assets will result in a magnified movement, in the same direction, of that NAV. This may mean that you could get back nothing at all. The mention of any specific shares should not be taken as a recommendation to deal.**

### Important information

Alliance Trust is an investment company with investment trust status. The views, information and data in this publication should not be deemed as a financial promotion or recommendation. Alliance Trust is not authorised to give financial advice. For security and compliance monitoring purposes, telephone calls may be recorded. All data in this document is as at 31 May 2019 unless otherwise stated.

### Share investment

Alliance Trust invests primarily in equities and aims to generate capital growth and a progressively rising dividend from its portfolio of investments. Alliance Trust currently conducts its affairs so that its shares can be recommended by Independent Financial Advisers (IFAs) to ordinary retail investors in accordance with the Financial Conduct Authority (FCA) rules in relation to non-mainstream investment products and intends to continue to do so for the foreseeable future. The shares are excluded from the FCA's restrictions which apply to non-mainstream investment products because they are shares in an investment trust. The shares in the Trust may also be suitable for institutional investors who seek a combination of capital and income return. Private investors should consider consulting an Independent Financial Adviser who specialises in advising on the acquisition of shares and other securities before acquiring shares. Investors should be capable of evaluating the risks and merits of such an investment and should have sufficient resources to bear any loss that may result.

Issued by Towers Watson Investment Management Limited. Towers Watson Investment Management Limited, registered office Watson House, London Road, Reigate, Surrey RH2 9PQ is authorised and regulated by the Financial Conduct Authority, firm reference number 446740.
