

Monthly Factsheet

SUMMARY OF APPROACH

Alliance Trust aims to be a core equity holding for investors that delivers a real return over the long term through a combination of capital growth and a rising dividend. The Company invests primarily in global equities across a wide range of industries and sectors to achieve its objective.

The Company's investment manager, Willis Towers Watson, has appointed a number of stock pickers with different styles, who each ignore the benchmark

and only buy a small number of stocks in which they have strong conviction. Therefore, we believe investors get the benefit of both highly focused stock picking to increase potential outperformance versus the benchmark and manager diversification which should reduce risk and volatility. We believe that the Company's diversified but highly active multi-manager portfolio is competitively priced.

INVESTMENT PERFORMANCE

ABSOLUTE PERFORMANCE (TOTAL RETURN IN STERLING)

CUMULATIVE PERFORMANCE (%)

MSCI ACWI total return ⁴	85.6	62.8	41.2	24.3	15.1	3.6

The NAV total return reflects the impact of owning investments other than global equities prior to 30 June 2019, which had a drag on the return. Between 1 April 2017 and 31 August 2021, the performance of the equity portfolio before fees (a good approximation of the NAV total return after costs had these legacy investments not been included), was 65.7% versus the return on the MSCI ACWI Index⁴ of 62.8%.

Risk warnings

Past performance is not a reliable indicator of future returns. The value of shares and the income from them can rise and fall, so investors may not get back the amount originally invested. Net Asset Value ("NAV") performance is not the same as share price performance and investors may not realise returns in line with NAV performance. Exchange rate changes may cause the value of overseas investments to go down as well as up and can impact on both the level of income received and capital value of your investment. Investment trusts may borrow to finance further investment (gearing). The use of gearing is likely to lead to volatility in the NAV, meaning that a relatively small movement, down or up, in the value of an investment trust's assets will result in a magnified movement, in the same direction, of that NAV. This may mean that you could get back less than you invested or nothing at all.

Investment Commentary

For the month of August, the Company's Total Shareholder Return and NAV Total Return were 3.4% and 3.8% respectively, while the MSCI All Country World Index (ACWI) returned 3.6%.

Over the month, the Company's most significant contributor to return was Nvidia Corporation, with an absolute return of 16%. The gaming and technology giant released strong second-quarter results, which were above consensus estimates in revenue and earnings, increasing market confidence in its long-term growth potential. In contrast, Visa Inc was the primary detractor from performance over August, with an absolute return of -6%. Persistent travel restrictions meant that the credit transaction facilitator continued to see reduced cross-border transaction volumes. Despite this, earnings for Visa Inc are expected to accelerate in the coming months given the return to normality globally, and therefore the

Company's stock pickers continue to have strong conviction in Visa and believe that there are significant gains to be made.

Within the Company's portfolio, the position in HCA healthcare, the largest US public hospital provider, was exited as it approached the estimate of fair value. This was replaced with Cigna, another healthcare stock that provides a broad range of medical cover, from pharmacy services to dentistry to over 70 million people. XPO Logistics, a US transportation company, has thrived since March 2020 as the spin-off of their global contract logistics operation (GXO Logistics) unlocked significant value. As such, both XPO and GXO positions were sold given that the valuations had reached targets. They were replaced with a new position in NRG Energy, a US retail electricity provider.

Past performance is not a reliable indicator of future returns. The mention of any specific shares should not be taken as a recommendation to deal.
